Accelerated Review in Medical Oncology

2025 | OCTOBER 31 – NOVEMBER 1

Rockefeller Research Laboratories
New York City

Complimentary for All Fellows

Memorial Sloan Kettering
Cancer Center

Overview

Condensed into two comprehensive days, this accelerated course at **Memorial Sloan Kettering Cancer Center (MSK)** provides a high-yield review of the material tested in the **American Board of Internal Medicine (ABIM)** certification and recertification examinations in **Medical Oncology**.

With the rapid expansion of knowledge in medical oncology, preparing for board exams has become increasingly challenging. This course is designed to provide a focused review of the diagnosis, staging, and management of **solid tumors and malignant hematologic disorders**. Emphasis will be placed on **common, curable malignancies and other high-impact topics** frequently tested on the boards.

Each topic will be delivered through **concise micro-lectures**, ensuring efficient coverage of essential material. Participants will also **receive summary notes for each topic** to support their study and exam preparation. To conclude the course, a **networking reception** on Saturday will offer attendees the opportunity to connect and engage with faculty and fellow participants.

This course is designed for hematology/oncology fellows preparing for initial board certification, as well as medical oncologists seeking initial certification or recertification. We're delighted to offer **complimentary registration for all fellows** to attend this course.

This course will offer **AMA PRA Category 1 Credits™** and **ABIM Maintenance of Certification (MOC)** points; see the **Accreditation** section for full details.
