The Pathology of Neoplastic Diseases | May 3–May 7, 2021

Summary
This four and one half day course will provide an up-to-date review of the pathology of selected sub-speciality areas of neoplastic disease, including gynecological, head and neck and breast pathology. Appropriate use of advanced diagnostic techniques such as immunohistochemistry, and molecular pathology will be incorporated into the lectures, including the assessment of therapeutic biomarkers. Case presentations will also be integrated into some sessions.

Finally, more intimate, interactive slide seminar sessions on selected topics in gynecological, head and neck and breast pathology will be available for smaller group discussion.

The Department of Pathology at Memorial Sloan Kettering Cancer Center has produced a course on the Surgical Pathology of Neoplastic Diseases for over 30 years. With the 37th edition, we continue to expand the scope of the course to reflect the increasing contributions of cytopathology, immunopathology, and molecular pathology. The course faculty will include the attending pathology staff from Memorial Sloan Kettering Cancer Center along with selected clinical faculty. Course participants will receive a complete syllabus within our new CME portal, along with digitized glass slides of cases for review. This course will be held virtually via Zoom and recordings of each video file will be available on our CME portal.

Audience
This course is directed toward practicing pathologists, both in academic and private practice environments, as well as residents and fellows in pathology, who wish to broaden their understanding of neoplastic diseases.

Accreditation Statement
Memorial Sloan Kettering Cancer Center is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

AMA Credit Designation Statement
Memorial Sloan Kettering Cancer Center designates this live material activity for a maximum of 29 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Virtual Platform
This course will be delivered as a live virtual experience. By registering for the live virtual course, you will be able to view presentations, hear live audio, and interact online.

Goals of the Course
This course is aimed at providing an up-to-date review of the pathology of neoplastic disease, with an emphasis on clinical features, diagnostic criteria, and differential diagnoses.

Educational Objectives
Participants will learn the current classifications and diagnostic criteria for tumors and tumor-like lesions of the selected sub-specialty areas, including both common and unusual entities. The appropriate use of ancillary diagnostic techniques will be highlighted. Complete differential diagnoses will be discussed, and a practical, problem-oriented approach to the pathologic evaluation of specimens will be emphasized. Participants will learn about the clinical features of the various tumor entities along with pathologic and molecular prognostic factors and predictors of therapeutic responsiveness.

Registration Notes
Refunds are subject to a $75 administrative charge and will be processed after the conference. For more information, please contact the CME office at 646-227-2025, Fax: 212-557-0773, Address: 633 Third Avenue, 12th FL, New York, NY 10017 or via e-mail at cme@mskcc.org.
