CONTEMPORARY MANAGEMENT OF COMPLEX SKIN CANCERS

This course offers unique multidisciplinary management approaches to complex skin cancers.

Memorial Sloan Kettering
Cancer Center

Overview

This course offers **unique multidisciplinary management of complex skin cancers** including high risk basal cell carcinoma, squamous cell carcinoma, and melanoma. **Novel diagnostic methods and updates in tumor classification** will be emphasized. Complex skin malignancies will be presented and discussed in a **tumor board style with a panel of experts** from dermatology, head and neck surgery, medical, surgical, and ophthalmic oncology, plastic surgery, pathology, and radiation oncology.

Who Should Attend

The course is intended for physicians and allied health professionals, who care for patients with skin cancer, including dermatologists, surgical and medical oncologists, otolaryngologists, ophthalmologists, general surgeons, plastic surgeons, pathologists, and radiation oncologists.

Learning Objectives

- Describe melanoma and non melanoma skin cancer incidence and staging systems
- Define characteristics of skin cancers that require multidisciplinary treatment
- Review novel approaches to optimize surgical treatment of skin cancers
- Assess role and variety of radiotherapeutic approaches to complex skin cancer
- Review role of biological therapy in the treatment of advanced skin cancer

We are excited to welcome attendees
back to New York City.

Course Location

Rockefeller Research Laboratories
