Controversies in Gastrointestinal Premalignant and Malignant Disorders

2020

APRIL 3 • NEW YORK CITY
Zuckerman Research Center
417 East 68th Street

Featuring the 2nd Annual
Sidney J. Winawer, MD Lectureship

Memorial Sloan Kettering Cancer Center
Overview

Early recognition and management of premalignant gastrointestinal disorders are important in the prevention and early detection of cancer. With advances in our understanding of the pathogenesis and natural history of premalignant and malignant GI disorders, treatment algorithms continue to evolve. Emerging endoscopic techniques also play an important role in the diagnosis and management of these patients.

This one day course will update the participant on current controversies regarding the diagnosis, management and surveillance of GI premalignant and malignant disorders involving the upper and lower GI tracts, liver and pancreaticobiliary tracts.

Topics will include genomics of inherited GI cancers, Barrett’s esophagus, gastric intestinal metaplasia, ESD in GI tract, hepatocellular carcinoma, pancreas cyst lesions, malignant hilar biliary obstruction, colorectal cancer screening, fecal immunochemical test (FIT)-DNA stool testing, IBD and dysplasia, chemoprevention for Lynch syndrome and FAP, hereditary gastric cancer, and pancreas cancer screening in high-risk populations. The course will utilize didactic lectures as well as clinical case presentations.

Target Audience

The target audience for this course includes physicians and other healthcare professionals who take care of patients with gastrointestinal, liver and pancreaticobiliary disorders, including gastroenterologists, surgical oncologists, medical oncologists, interventional radiologists, clinical geneticists, fellows, residents, physician assistants, nurse practitioners and registered nurses.

Live Simulcast Available*

Unable to attend this course in person? We are pleased to offer a live simulcast for this course. CME and ABIM MOC credit is offered for the live simulcast and pre-registration is required. We do hope you will attend in person but understand that can sometimes be a challenge, so we are happy to offer the live simulcast as an option.

*The live simulcast is only available to non-MSK attendees. MSK employees are welcome to register to attend this course in person.

Learning Objectives

By attending this symposium, attendees will:

• Understand the genomics associated with inherited GI cancers
• Review the diagnosis and management of Barrett’s esophagus, including endoscopic therapy for dysplasia
• Become familiar with the diagnosis and management of gastric intestinal metaplasia
• Evaluate the utilization of ESD for the management of GI tract neoplasia and early malignancy
• Become aware of surveillance strategies for hepatocellular carcinoma
• Recognize the diagnosis and surveillance of pancreas cyst lesions
• Discuss the role of endoscopic and interventional radiology management for malignant hilar biliary obstruction
• Examine when to start and stop screening for colorectal cancer
• Determine the follow-up management after a positive fecal immunochemical test (FIT)-DNA stool test and negative colonoscopy
• Review the endoscopic and surgical management options for IBD-associated colorectal dysplasia
• Discuss the role for chemoprevention in Lynch syndrome and FAP
• Evaluate the role of endoscopic surveillance vs surgical management in hereditary gastric cancer
• Examine the role of pancreas cancer screening in high-risk populations

**Industry professionals may attend MSK CME activities for their own education. Marketing, sales, and promotion of products and services is strictly prohibited at MSK CME activities.

***The live simulcast is only available to non-MSK attendees. MSK employees are welcome to register to attend this course in person.

Register online at: mskcc.org/gastrocourse

In-person course registration includes continental breakfast, lunch, and refreshment breaks. Please contact cme@mskcc.org at least one week prior to the course if you have any special dietary requests or require any specific accommodations.

- **MSK Alumni, MSK Cancer Alliance and Cancer Care Partner discounts available. Please contact cme@mskcc.org for more information or a promotion code.
- **MSK employee registration is complimentary. However, you must complete course registration in order to attend this course.

After your payment has been processed, no further promotional discount adjustments will be made to your registration. Please visit mskcc.org/gastrocourse for additional information and cancellation details.

**Accreditation**

Memorial Sloan Kettering Cancer Center is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

**AMA Credit Designation Statement**

MSK designates this live activity for a maximum of 7.00 AMA PRA Category 1 Credits™. Physicians should claim only credit commensurate with the extent of their participation in the activity.

**ABIM MOC Recognition Statement**

Successful completion of this CME activity, which includes participation in the evaluation component, enables the participant to earn up to 7.00 Medical Knowledge MOC points in the American Board of Internal Medicine’s (ABIM) Maintenance of Certification (MOC) program. It is the CME activity provider’s responsibility to submit participant completion information to ACCME for the purpose of granting ABIM MOC credit.

**Faculty Disclosure**

It is the policy of MSK to make every effort to insure balance, independence, objectivity, and scientific rigor in all continuing medical education activities which it provides as an ACCME accredited provider. In accordance with ACCME guidelines and standards, all faculty participating in an activity provided by MSK are expected to disclose any significant financial interest or other relationship with the manufacturer(s) of any commercial product(s) and/or provider(s) of commercial services which are discussed by the faculty members in an educational presentation. As required by the ACCME, when an unlabeled use of a commercial product or an investigational use not yet approved for any purpose is discussed during an educational activity, MSK requires the speaker to disclose that the product is not labeled for the use under discussion or that the product is still investigational.
