Cancer Center

www.mskcc.org/ovarianconference

Course Overview

Advances in women's health research provide important opportunities to enhance the screening and prevention of ovarian cancer. New modalities in the treatment of the disease provide the ability to individualize therapy, accomplish best clinical outcomes, and optimize the patient experience.

Educational Objectives

This course is designed to present the most current information on ovarian cancer with the goal of advancing the prevention, screening and treatment for ovarian cancer.

- Discuss new genetic panel testing and its implication, results of recent ovarian cancer screening trial, and strategies for ovarian cancer risk-reduction.
- Present new algorithms for imaging and surgical case selection.
- Evaluate emerging opportunities in clinical trial options, individualized treatment, and enhanced patient experience.

Target Audience

All clinicians, scientists and advocates interested in women's health, and in optimizing the prevention, screening and treatment for ovarian cancer. Clinicians including OB/GYNs, surgical/medical/gynecologic oncologists, primary care physicians, physician assistants, nurse practitioners, nurses, fellows and residents and other healthcare professionals are welcome.
