Course Overview

The overall objective of this course is to update the learner on the recent progress made in the treatment of colorectal cancer. This will be achieved by lectures and interactive audience participation encouraging the intellectual exchange of ideas between faculty and participants.

EDUCATIONAL OBJECTIVES

- Appreciate the importance of a multidisciplinary approach to diagnosis and treating colorectal cancer
- Learn the new advances in genomic typing and its implications for novel therapies in colorectal cancer
- Understand the contemporary endoscopic and minimally invasive surgical approaches to colorectal cancer
- Learn the importance of outcomes measurement, surveillance and survivorship program in colorectal cancer patients
- Understand the treatment options for patients with metastatic colorectal cancer

TARGET AUDIENCE

The target audience includes medical oncologists, radiation oncologists, surgical oncologists, colorectal surgeons, gastroenterologists and specialists in internal medicine.
