3rd Annual MSK CANCER ALLIANCE SYMPOSIUM

Innovations in Personalized Oncology: A Case-Based Approach

The MSK Cancer Alliance is a collaborative relationship, leveraging bi-directional learning for mutual improvement. It is composed of MSKCC and a small number of high quality, community systems with a focus on clinical research and a culture of improvement. The MSK Cancer Alliance strives to bridge the knowledge gaps between an academic comprehensive cancer center such as MSK and community hospitals in order to help facilitate the delivery a high quality cancer care at the community level, an important need since most cancer care is delivered in the community setting. Each Alliance Member Institution seeks to be a center of excellence in their respective community. The bi-directional learning that the MSK Cancer Alliance promotes is one way in which they are moving towards this goal.

This CME course has been designed to highlight the multidisciplinary approach to cancer care taken by MSK and its Alliance Members. Unlike other CME courses which focus on a single disease or discipline, this course emphasizes a multidisciplinary team approach and highlights the important role played by each team member. The educational goals of this course are to improve the lives of cancer patients through dynamic partnerships with local care providers as in the MSK Cancer Alliance; to learn from one another in a bi-directional, collaborative manner; and to share the vision of our partnership as an ongoing endeavor tailored to meet the unique needs of members and the communities they serve.
