

LIVE VIRTUAL SYMPOSIUM

November 6-7, 2020

Memorial Sloan Kettering Cancer Center presents

ONCOLOGY ACUPUNCTURE:

*From Neuroscience
to Patient Wellbeing*

In partnership with the
Society for Acupuncture Research

Memorial Sloan Kettering
Cancer Center

A Note from the Course Directors

Dear Colleagues:

The COVID-19 pandemic has created tremendous challenges for all of us in treating our patients impacted by cancer. As we continue to acquire knowledge about this novel coronavirus, we must remain vigilant so that we are able to provide them with safe, high quality, evidence-based care.

The emergence of virtual platforms in the era of physical distancing provides an important opportunity for us to meet online. **Oncology Acupuncture: From Neuroscience to Patient Wellbeing** will take place as a **two-day virtual symposium on Friday, November 6th, and Saturday, November 7th, 2020**. We will use our state-of-the-art technology to broadcast this course live. Through a combination of didactic presentations, live panel discussions, and special breakout workshops, we will come together to connect with leaders from MSK and around the world to evaluate the latest evidence for oncology acupuncture.

In the midst of this public health crisis, we still have much to learn. Over the course of this symposium, we will explore the neuroscience and clinical evidence of acupuncture and start determining how to safely move forward with the delivery of acupuncture in cancer settings. We look forward to gathering with you for the first-ever virtual oncology acupuncture symposium.

Sincerely,

Jun J. Mao, MD, MSCE

Ting Bao, MD, DABMA, MS

Society for Acupuncture Research (SAR) member discount available.

mskcc.org/oncologyacupuncture

Symposium Overview

This symposium will focus on the neuroscientific mechanisms of acupuncture for pain and symptom management and its application in cancer care.

We will connect neuroscience and basic research with clinical evidence for oncology acupuncture symptom management. Our international panelists will also present the progress and challenges of providing acupuncture services in the oncology setting.

Learning Objectives

- Describe the mechanisms of acupuncture involving central modulation and peripheral stimulation
- Evaluate the current evidence of acupuncture for symptom management
- Determine strategies for engaging healthcare providers and health care systems to disseminate and implement acupuncture research findings in cancer care

Target Audience

This symposium is intended for health care providers (physicians, advanced practice providers, nurses, psychologists, social workers, and acupuncturists) who diagnose, manage, and treat side effects of cancer treatment and those who develop programs (administrators) to improve quality of life for people with cancer. Additionally, we are pleased to invite patient advocates to attend this symposium.

LIVE VIRTUAL SYMPOSIUM

By registering for this live virtual symposium, you will be able to view presentations, hear live audio, and interact online. CME and NCCAOM credit will be offered for this course and a certificate will be available after a post-course evaluation is complete. This new live virtual course will be fully web-based, so all you will need is a computer, phone, or tablet and an internet connection. Access details will be emailed to all attendees before the course.

Accreditation

Memorial Sloan Kettering Cancer Center is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

AMA Credit Designation Statement

Memorial Sloan Kettering Cancer Center designates this live activity for a maximum of **7.75 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

NCCAOM Accreditation

Memorial Sloan Kettering Cancer Center is an National Credentialing Commission of Acupuncture and Oriental Medicine (NCCAOM) Professional Development Activity Provider #299. *Oncology Acupuncture: From Neuroscience to Patient Wellbeing* is PDA Course #299-20 and approved for **7.50 PDA points**.

Faculty Disclosure

It is the policy of MSK to make every effort to insure balance, independence, objectivity, and scientific rigor in all continuing medical education activities which it provides as an ACCME accredited provider. In accordance with ACCME guidelines and standards, all faculty participating in an activity provided by MSK are expected to disclose any significant financial interest or other relationship with the manufacturer(s) of any commercial product(s) and/or provider(s) of commercial services which are discussed by the faculty members in an educational presentation. As required by the ACCME, when an unlabeled use of a commercial product or an investigational use not yet approved for any purpose is discussed during an educational activity, MSK requires the speaker to disclose that the product is not labeled for the use under discussion or that the product is still investigational.
