ORAL ONCOLOGY SYMPOSIUM

A MULTIDISCIPLINARY APPROACH

NOVEMBER 16-17, 2018 · NEW YORK

Memorial Sloan Kettering
Cancer Center

Oral Oncology Symposium

The goal of this multidisciplinary symposium is to provide the basic knowledge of head and neck cancer diagnosis, treatment and management of its sequelae and complications. We will focus on the critical importance of a multidisciplinary approach to diagnosis and treatment of head and neck malignancy. The panel of speakers will include members of the Head and Neck Service, Dental Service, Radiation Oncology, Medical Oncology, Pathology, Speech and Hearing Service and Rehabilitation Service.

Symposium Objectives

- Identify the major fundamentals of treatment for head and neck cancer
- Describe the multidisciplinary approach in the treatment of head and neck cancer
- Identify oral complications of head and neck cancer treatment

Target Audience

This symposium is intended for physicians, dentists, otolaryngologists, dental and medical residents and fellows, nurses, PAs, NPs, hygienists, dental assistants, students and other healthcare professionals

Dental Oncology Program

Optional Saturday Session

The morning session on Saturday will be dedicated to Dental Oncology. The goal of this session is to provide the dental provider with the fundamental knowledge of the oral manifestations, sequelae and complications of cancer and its treatment. Particular focus will be placed on the oral/dental management and dental rehabilitation of patients treated for head and neck cancer, anti-resorptive therapy, pediatric cancer and hematologic malignancy.

Session Objective

- Identify the various oral sequelae of cancer and its treatment, tools for diagnosis and management
