State-of-the-Art Gynecologic Surgery & Ovarian Cancer Management
CONFERENCE 2018

Advances in gynecologic surgery and women’s health research provide important opportunities to enhance women’s gynecologic health as well as the prevention and treatment of ovarian cancer. New modalities in the management of the disease provide the ability to individualize therapy, accomplish best clinical outcomes, and optimize the patient experience. This course is designed to present the most current information on gynecologic surgery and ovarian cancer with the goal of advancing the gynecologic outcomes, and the prevention and treatment for ovarian cancer.

Target Audience
This course is intended for OB/GYNs, medical and surgical oncologists, gynecologic oncologists, radiologists, pathologists, geneticists, primary care physicians, physician assistants, nurse practitioners, nurses, fellows, residents, scientists and other healthcare professionals interested in women’s health, and in optimizing the prevention and treatment for ovarian cancer.

Educational Objectives
- Discuss advances in gynecologic surgery including methods to reduce surgical site infection, length of stay, DVT, and perioperative pain management.
- Present options for minimally invasive gynecologic surgery in the management of the adnexal mass and risk-reducing procedures.
- Present state of the art strategies for the medical and surgical management of primary and recurrent ovarian cancer.
- Evaluate emerging opportunities in clinical trial options, individualized treatment, and enhanced patient experience.
