

2nd Congress Featuring Cancer Pain and Perioperative Medicine Experts from Around the World

September 13-14, 2019
New York City

MSK's 2nd Congress of the Interventional Cancer Pain Symposium will provide an unparalleled experience for attendees involved in the treatment of oncologic pain patients. This year's program will have an expanded experience in the fields of neurosurgery, rehabilitation, integrative medicine, supportive and palliative care, and interventional radiology for attendees. The advanced workshop will incorporate the ever-expanding role of neuromodulation in the treatment of the oncologic population. Additionally, a new emergency and perioperative medicine track will include lectures and a regional anesthesia workshop on day 1 as well as a regional anesthesia cadaver workshop for anesthesia and emergency medicine health providers on day 2.

This year's symposium will have two tracks, a lecture track (main conference) and a workshop track. Attendees can register for the track of their choice.

Lecture Track (Main Conference)

Highlights of the main conference agenda will include the expanded role and treatment options offered by neurosurgery, interventional radiology, oncology, supportive care, rehabilitation and integrative medicine. We will also have breakout sessions for the increasing role of Nursing and Advanced Practice Providers in the management of oncologic pain patients.

Day 2 optional breakout sessions:

- Innovations in Pain Medicine - Novel Research Series
- APP Lecture Series (includes hands-on live model rotations)

MSK Course Director

Amitabh Gulati, MD, FIPP, CIPS
Director, Chronic Pain

MSK Course Co-directors

Vinay Puttannah, MD
Director, Regional Anesthesia and Analgesia

Grant H. Chen, MD

Workshop Track*

This year's technical workshops will be optimized to include sessions specifically designed in neuromodulation, intrathecal drug delivery, rehabilitation and complementary medicine. State-of-the-art techniques in fluoroscopy and ultrasound guidance will be available to all attendees who register for the advanced workshops.

Available workshops:

- Cancer Pain Workshop
- Perioperative Medicine Workshop
- Peripheral Nerve Stimulation/Musculoskeletal (PNS/MSK) Workshop

*The day 2 Cadaveric Workshop will be held at an off-site location. Additional details will be available online soon and registered attendees will be notified of all course updates.
