

The background of the top half of the image is a night-time photograph of the Statue of Liberty on the left, with her right arm raised holding a torch. To her right is the illuminated skyline of New York City, including the Empire State Building, all reflected in the water of the harbor. The sky is a deep blue.

Memorial Sloan Kettering Cancer Center is pleased to announce the

9TH ANNUAL GLOBAL CONFERENCE ON

Perioperative Care of the Cancer Patient

Memorial Sloan Kettering
Cancer Center

DECEMBER 10-11, 2020
NEW YORK, NY

9TH ANNUAL GLOBAL CONFERENCE ON

Perioperative Care of the Cancer Patient

This international meeting is the work of leading anesthesiologists from several cancer centers of excellence worldwide. The multispecialty international consortium will address the clinical and translational evidence emerging in perioperative cancer care. The conference is designed to address the complexity and unique challenges for the perioperative care of the cancer patient and cancer survivors. As the incidence of cancer and cancer survivorship grows, there is an increased need for anesthesiologists, surgeons, interventional radiologists, nurses and other perioperative health care professionals to provide their services for the multiple diagnostic and interventional procedures in this patient population. This conference will focus on the key elements related to perioperative care of the cancer patient needed to deliver value-based patient centric care.

This one-and-a-half-day conference will consist of scientific panels, lectures and small group discussions and the opportunity to network with leading international onco-anesthesiologists, surgeons and scientists.

The course is intended for anesthesiologists, surgeons, medical oncologists, internists, basic scientists, CRNAs, perioperative nurses and allied health professionals. The course will also be geared towards scientists involved in translational and clinical research.

MEMORIAL SLOAN KETTERING COURSE DIRECTORS

Anahita Dabo-Trubelja, MD
Associate Attending
Anesthesiology-Critical Care

Eric R. Kelhoffer, MD
Attending
Anesthesiology-Critical Care

Rebecca S. Twersky, MD, MPH
