Thoracic Pathology
New York City | 2017

REGISTRATION

September 15-17, 2017

EARLY* GENERAL

$955 $695 MDs, PhDs and DOs

$889 $329 Fellows, Residents, and RNs

*Deadline in August 7, 2017.

Registration includes all educational materials and other related hand-out materials, continental breakfast, lunch and refreshment breaks. Special meals are available upon request including vegetarian, kosher or gluten-free. Please inform us if you have any dietary restrictions.

To register or for additional information, please go to:

PATHOLOGY

September 15-17, 2017

COURSE OVERVIEW

This course is designed to give a current review of thoracic pathology with clinical and radiologic correlations. The course will run for two and one half days and will consist of a series of presentations with some multidisciplinary sessions regarding lung cancer, interstitial lung disease and non-neoplastic lung disease. Updates on the WHO Classification of Lung Tumors, the 8th Edition TNM Staging Classification, and ATS/ERS Classification of Interstitial Pneumonias will be presented. Most of the speakers will be expert lung pathologists, but there will also be clinical and radiologic presentations by well-known thoracic clinicians and radiologists. The presentations will illustrate the importance of a multidisciplinary approach to solving difficult problems in thoracic disease. Self Assessment Module Credits (SAMs) will be available.

The course will be held on the campus of Memorial Sloan Kettering Cancer Center on the Upper East Side of Manhattan, a vibrant and safe neighborhood within easy access of the widely varied cultural attractions of New York City.

OBJECTIVES

By the end of this course the participant should:

- Have a grasp of current concepts in lung, pleural and mediastinal pathology
- Understand the importance of correlation between clinical, radiologic and pathologic data in diagnosis and management of interstitial lung disease and pulmonary vasculitis
- Know the significance of lung biopsy and multidisciplinary correlation for the diagnosis of non-neoplastic lung disease in acute lung injury and in cancer patients
- Comprehend the most recent histologic concepts in lung cancer diagnosis and classification including the importance of a multidisciplinary approach to solving difficult problems in thoracic disease.
- Realize the important issues in molecular targeted therapy for lung adenocarcinoma
- Have a practical understanding of differential diagnosis for mediastinal and pleural lesions
- Understand the usefulness of cytology in pulmonary, pleural and mediastinal diagnoses
- Be aware of current developments in all the above areas with an emphasis on molecular biology and lung cancer.

TARGET AUDIENCE

This course will be invaluable for pathologists, pulmonologists, thoracic surgeons, and radiologists, including physicians in training.

CREDIT

The course will run for two and one half days and will consist of a series of presentations with some multidisciplinary sessions regarding lung adenocarcinoma, interstitial lung disease and non-neoplastic lung disease in cancer patients.

EVALUATION

A course evaluation survey will be electronically sent out electronically to review the sessions and the speakers and to provide attendees with the opportunity to review the sessions and the speakers and to identify future educational needs.

OUTCOMES MEASUREMENT SURVEY

Six months after the end of the course an Outcomes Measurement Survey will be sent to all participants to help determine what positive impacts have been made on participant practice as a result of the course.

OFFICE OF CONTINUING MEDICAL EDUCATION

633 Third Avenue, 12th floor

New York City

MEMBER REGISTRATION FEE

Fellowship, Residents, and RNs:

$329

MDs, PhDs, and DOs:

$695

Fees include:

- Tuition
- Course materials
- Breakfast and lunch
- Continental refreshments

Fees do not include:

- Lodging
- Travel
- Personal expenses

Fees paid in full are non-refundable. The dates and locations of the courses are subject to change. This program will be presented in New York City | 2017.

SELF ASSESSMENT MODULES (SAMs)

This program will include SAM Credits (SAM) from the American Board of Pathology (ABP).
