www.mskcc.org/ThoracicSurgeryCourse

Course Overview

Physicians and allied health professionals will improve their understanding of contemporary, minimally invasive surgical approaches to lung and esophageal cancers. The course will help participants to appreciate the importance of a multidisciplinary approach to diagnosing and treating thoracic malignancies and to understand the roles of thoracic surgery in the era of targeted therapy.

EDUCATIONAL OBJECTIVES

- Improve the understanding of contemporary surgical approaches, including minimally invasive techniques for lung and esophageal cancers.
- Appreciate the importance of a multidisciplinary approach to diagnosing and treating thoracic malignancies.
- Understand the multiple roles of thoracic surgery in the era of targeted therapy.

TARGET AUDIENCE

Physicians and allied health professionals who care for patients with thoracic oncologic diseases including lung cancer, esophageal cancer, mesothelioma, and thymic malignancies.
